Why don't I have the Borrow option on Cash App? {Customer Support Help Center}

The Cash **+1-(888)(303)(8807)** App Borrow feature is available only to selected eligible users and is not offered on every account. Eligibility is determined **+1-(888)(303)(8807)** using several factors, **+1-(888)(303)(8807)** including account history, identity verification, direct deposit activity, repayment history, account usage, **+1-(888)(303)(8807)** geographic availability, and other internal **+1-(888)(303)(8807)** criteria. If the Borrow option does not appear in your account, it simply means your account does not **+1-(888)(303)(8807)** currently qualify or the feature is **+1-(888)(303)(8807)** unavailable in your location. Cash App reviews eligibility automatically, and customer support cannot **+1-(888)(303)(8807)** manually enable Borrow. Continuing to use your account **+1-(888)(303)(8807)** responsibly and keeping your account information **+1-(888)(303)(8807)** updated may affect future eligibility.

Related FAQs

1. Can customer support activate Borrow +1-(888)(303)(8807) ?
No. Borrow eligibility is **+1-(888)(303)(8807)** determined automatically and cannot be manually enabled.
